## Work Experience

### Remind (Co-op evaluations: Outstanding/Excellent)

- Replaced a prototype chat backend with a chat micro-service, to separate chat performance concerns from the main API
- Rewrote the web dashboard using React for feature parity with the mobile clients
- Updated SMS copy to be more user-friendly and clear, resulting in the largest increase in SMS users installing the app in years
- Consolidated old cross-platform prompt systems into a flexible, easy-to-extend system that's been adopted by other teams successfully

[remind.com/about](http://remind.com/about)

Jan. 2015 - Aug. 2015, May 2016 - Aug. 2016

Ruby, Go, Javascript, Java

Rails, DynamoDB, React.js, Android

### A Thinking Ape (Co-op evaluations: Excellent/Excellent)

- Developed the iOS frontend of a prototype poker app focusing on playing with friends, which eventually became **Pineapple Poker**
- Created and improved analytics tools on the metrics team in order for them to filter information faster and be able to see a user age breakdown for specific days
- Developed frontend features for a 3D racing game on Android, including an interactive map, and the movement/drift animation for the cars using GLES 2.0

[athinkingape.com/about](http://athinkingape.com/about)

May 2013 - Aug. 2013, Jan. 2014 - Aug. 2014

Objective C, Python, Javascript, Java

iOS, Django, Android, GLES 2.0

## Personal Projects

### Geometry Wars Clone

- Created a clone of the Xbox Live Arcade game Geometry Wars to learn how effects like the deformable grid, and bloom are implemented
- Particles are simulated on the GPU to have hundreds of thousands without slowdown
- Created a dynamic music system that plays more intense music when there's more enemies

[eat.sleep.build/Projects/GeoWarsClone](http://eat.sleep.build/Projects/GeoWarsClone)

[youtu.be/Xv-3VLCFOQM](https://youtu.be/Xv-3VLCFOQM)

Sept. 2013 - Dec. 2013

Scala

LWJGL, OpenGL, GPGPU

### ATA Co-op Hackathon Game

- Created a 2D multiplayer deathmatch platformer for a 48-hour hackathon at A Thinking Ape with two other programmers, and two artists
- Added the ability for players to phase through walls to add variety to the combat
- Responsible for movement and level collision, including wall jumping and dashing, and graphical effects like bullet trails and the desaturation effect when phasing through walls

[eat.sleep.build/Projects/ATAHackathonGame](http://eat.sleep.build/Projects/ATAHackathonGame)

[youtu.be/v7BLvpp1HIY](https://youtu.be/v7BLvpp1HIY)

A weekend in April 2014

Java

libGDX, OpenGL

### Deferred Renderer with SSAO

- Created a tech demo to learn how to implement some modern graphics techniques
- Implemented normal mapping and specular mapping to make walls look more detailed
- Implemented deferred rendering to efficiently render many lights
- Used depth information from the deferred rendering process to create a screen space approximation of ambient occlusion, to have light falloff more realistically in corners

[eat.sleep.build/Projects/DeferredRenderer](http://eat.sleep.build/Projects/DeferredRenderer)

[youtu.be/eJY72rMtFx4](https://youtu.be/eJY72rMtFx4)

Sept. 2014 - Dec. 2014

Scala

LWJGL, OpenGL

### eat.sleep.build

- Created a Haskell webapp running on top of lighttpd
- Created an Html DSL using monads to programmatically compose html
- Built from a "Hello World" Haskell application into a full website to better understand how other frameworks like Django and Rails work

[eat.sleep.build](http://eat.sleep.build)

Nov. 2012 - present

Haskell

lighttpd

## School

4B Computer Science at University of Waterloo – Expected graduation: April 2017
